

IN THE CLAIMS

1. (Original) A computer keyboard device comprising a decorative sealed vessel, comprising:
 - a first liquid,
 - a second liquid, and
 - at least one structure,wherein the structure is insoluble in both the first and second liquids, and floats on the first liquid; the first and second liquids are immiscible; the first and second liquids have densities such that the first liquid is beneath the second liquid;
wherein the structure can maintain its upright position and remain in suspension permanently; and
wherein the decorative sealed vessel is an integral portion of the computer keyboard.
2. (Original) The computer keyboard device as claimed in claim 1 wherein the sealed vessel is positioned in place of a portion of a main housing of the keyboard.
3. (Original) The computer keyboard device as claimed in claim 1, wherein the structure resembles a decorative element.
4. (Original) The computer keyboard device as claimed in claim 1, wherein the decorative sealed vessel replaces a key of the computer keyboard.
5. (Currently Amended) The computer keyboard device as claimed in claim 1, wherein the decorative sealed vessel ~~structure~~ can resemble anything or anyone of a user's desire.
6. (Original) The computer keyboard device as claimed in claim 1, wherein the first liquid and the second liquid are both colorless.
7. (Original) The keyboard device as claimed in claim 1, wherein the first and the second liquid have contrasting or complimenting colors.
- 8-9. (Cancelled)
10. (Original) A method of forming a computer keyboard device comprising a decorative sealed vessel, comprising the steps of:
 - providing a first liquid,
 - providing a second liquid, and

providing at least one structure, wherein the structure is insoluble in both the first and second liquids, and floats on the first liquid; the first and second liquids are immiscible; the first and second liquids have densities such that the first liquid is beneath the second liquid; and wherein the structure can maintain its upright position and remain in suspension permanently;

retaining said first liquid, said second liquid and said at least one structure in said decorative sealed vessel; and

integrally fixing the decorative sealed vessel as a portion of the computer keyboard.

11. (Original) The method of claim 10, wherein the sealed vessel is positioned in place of a portion of a main housing of the keyboard.

12. (Original) The method of claim 10, wherein the structure resembles a decorative element.

13. (Original) The method of claim 10, wherein the decorative sealed vessel replaces a key of the computer keyboard.

14. (Currently Amended) The method of claim 10, wherein the decorative ~~structure~~ sealed vessel can resemble anything or anyone of a user's desire.

15. (Original) The method of claim 10, wherein the first liquid and the second liquid are both colorless.

16. (Original) The method of claim 10, wherein the first and the second liquid have contrasting or complimenting colors.
